HOW TO CONNECT

Step 1: Connect the DVR to your MONITOR or TV

Connect a VGA or HDMI cord (not included) from your monitor or TV to the Output Port in the back of the DVR. Turn on your monitor or TV and select the appropriate input.

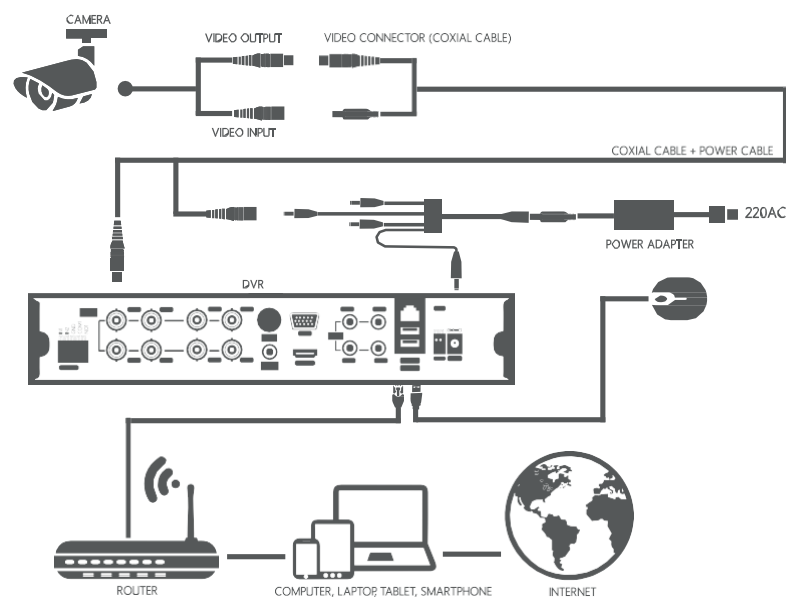

Step 2: Connecting the Cameras, Ethernet Cable and DVR

- Connect the USB cable to the bottom USB slot on the back.
- Connect the Ethernet cable to the back of the DVR.

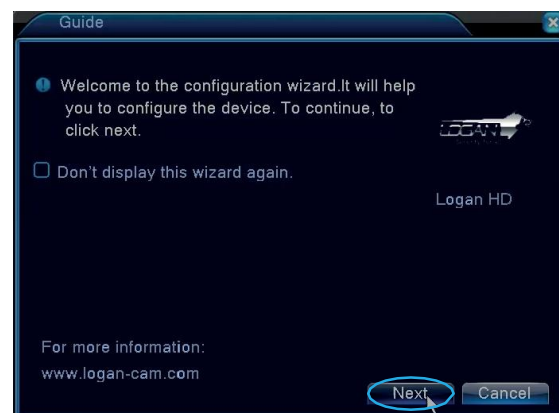

- Connect the other end of the cable directly to your router or high speed connection input.
- Connecting the BNC & Power from camera with BNC power cable using the side labeled "To Camera Side Only".
- Using the other side of BNC power cable labeled "To DVR Side Only", connect BNC to BNC video input on DVR.
- Connect camera power cable to one of the multi power splitter ends.
- Connect DVR power cable to the multi power splitter end labeled "DVR POWER"
- Connect DVR power supply to DVR  
 Plug DVR power supply into wall outlet

Note: Make sure all cameras and cables are properly connected prior to powering on the system.
