

Quick Guide Setup All In One Series

HOW TO CONNECT

INSTANT MOBILE VIEWING EASY SETUP

1 Connect the DVR to your MONITOR or TV

Connect a VGA or HDMI cord from your monitor or TV to the Output Port in the back of the DVR. Turn on your monitor or TV and select the appropriate input.

2 Connecting the Cameras, Ethernet Cable and DVR

- Connect the USB cable to the bottom USB slot on the back.
- Connect the Ethernet cable to the back of the DVR.
- Connect the other cable directly to your router or high speed connection input.
- Connecting the BNC & Power from camera with BNC power cable using the labeled "To Camera Side Only".
- Using the other side of BNC power cable labeled "To DVR Side Only", connect BNC to BNC video input on DVR.
- Connect camera power cable to one of the multi power splitter ends.
- Connect DVR power cable to the multi power splitter labeled "DVR POWER".

1 Press the mouse "right click" and Log in with user name (default: admin) and password (default: leave it in blank). Then, in the main menu, go to network.

2 Verify that the DHCP is enabled and press OK.

Download the Logan Live App In your Smartphone

Available on the App Store

LOGAN LIVE
Free App Compatible with iOS and Android

ANDROID APP ON Google play

3 Run the Logan Live App and select Local Login or register a new user by pressing Register and filling the required fields. On the App Main Menu, go to Device Manager and then press the "+" icon to proceed with the next step of adding your device.

4 On the Main Menu, go to Live Preview and select the device you want to view. Then press on the wanted camera. Once the connection is set up to your DVR, you will start viewing your world at anytime and anywhere.

Congratulations! You can now connect over the Internet to view your device remotely.
